

Safety notice PL-Hook buckles

Dear customers,

We have noticed that the locking button of some of the depicted PL-Hook buckles may come loose in rare cases such that the belt could become detached when unloaded. PL-Hooks manufactured since May 20th 2015 may be affected by this.

Our customers' safety is highly important to us. We hence encourage you to check the red locking button by firmly pushing it down with your thumb. The cover plate on the opposite side must thereby not move.

If the fit of the cover plate is not tight and secure, immediately stop using the product and contact Finsterwalder GmbH in Munich:

office@finsterwalder-charly.de or via telephone +49 89 8116528

We apologize for the inconvenience and appreciate your understanding.

Finsterwalder GmbH, Pagodenburgstr.8, 81247 Munich, Germany
