

Protected during air sports

Covid-19 Rules of conduct for paragliding and hang gliding

Keep distance

Distance < 2m: Wear mouth/nose protection

Have hand hygiene with you

Having a cold?
Stay at home

Before flying

Planning the flight:

- Accident prevention has absolute priority
- Check the meteorological flight conditions particularly critical
- Consider training deficits
- Inform about possible access restrictions at the flying site

Transport to the take-off site

- Prefer Hike & Fly

Follow these rules in vehicles:

- Loading and unloading of equipment individually and with distance from one another
- Wear mouth/nose protection in the vehicle
- Keep the prescribed distance between passengers
- Drive with open windows
- Disinfect vehicle regularly

At take-off and landing sites

- Entry in the start list (name, address, time)
- Keep the minimum distance of 2 m
- If the minimum distance is not reached, wear mouth/nose protection
- Use marked zones for waiting, preparation and take-off
- Keep spectators at a distance

Winch towing

- Handling with the towing ropes and take-off leading contactless
- Periodically disinfect radio equipment, winch and retrieve vehicle
- As few changes of winch operator and rope retriever as possible

IN CASE OF FIRST AID

- Wear mouth/nose protection and single-use gloves
- Tell the rescue personnel the personal data of the first-aiders
